

MOHAMMAD SAHIL

DATA ANALYST

Doha, Qatar | +974 5552 1940 | msahil2811@gmail.com |

PROFESSIONAL PROFILE

Detail-oriented Junior Data Analyst with hands-on experience in SQL, Python, Power BI, and Advanced Excel. Currently applying data analytics at Ooredoo Qatar to automate reporting, track KPIs, and support sales performance. Independently designed and built a full-featured data-cleaning and analytics application (Sahil's AI Data Studio v5.0) capable of processing multi-GB datasets, with automated quality checks, outlier detection, and executive-ready exports. Brings a strong foundation of technical skill combined with real-world business acumen from high-volume transactional environments spanning telecom sales, cashiering, and procurement. Passionate about transforming raw data into actionable insight that drives revenue and operational efficiency.

CORE SKILLS

SQL: MySQL, PostgreSQL, Complex Queries, Joins, CTEs, Window Functions

Python: Pandas, NumPy, Matplotlib, Data Cleaning, ETL Automation, VS Code

Power BI: DAX, Data Modeling, Interactive Dashboards, KPI Tracking

Advanced Excel: Pivot Tables, Dashboards, VLOOKUP/XLOOKUP, Macros, VBA And XLBooster

Data Quality: Outlier Detection (3-Sigma / IQR), Imputation, Data Auditing

Statistics: Descriptive Statistics, A/B Testing Basics, Trend Analysis

Visualization & BI: Tableau (basic), Google Data Studio / Looker Studio, Histograms, Trend Charts, Executive Reporting

AI & Prompting: ChatGPT/Claude/KIMI/Base 44 and DeepSeek Else for code generation, data analysis, and reporting

PROFESSIONAL EXPERIENCE

Sales, Cashier and Customer Service Representative — Ooredoo Qatar

2023 – Present | Doha, Qatar

- Built and automated a daily sales reporting pipeline using Python (Pandas) and Advanced Excel, reducing manual report preparation time by 60% (3+ hours saved daily) and enabling real-time KPI tracking for a team of 15+ sales representatives.
- Developed interactive Power BI dashboards to visualize sales trends, product performance, and customer segmentation, giving leadership drill-down capability by region, product, and time period.
- Utilized AI prompting (ChatGPT/Claude KIMI/ and DeepSeek Else) to generate Python automation scripts, optimize SQL queries, and create executive narrative summaries — cutting analysis delivery time by 40%.
- Processed and reconciled high-volume cash and card transactions via POS systems with 100% accuracy, maintaining zero-discrepancy records in a fast-paced retail environment.
- Managed corporate client bill payments and resolved complex billing queries using CRM data, improving client satisfaction scores and reducing escalations by 25%.

- Cross-sold and upsold products using data-driven customer insights, consistently exceeding monthly sales targets by 15–20% and ranking in the top 10% of performers.

Cashier – Reporting Profit and Losses — QSS Qatar Staff Services – AFC Event *Jan 2024 – Mar 2024 | Doha, Qatar*

- Processed high-volume cash and card transactions accurately using POS systems, maintaining zero-discrepancy reconciliation under time-sensitive event conditions.
- Managed customer orders and billing, translating fast-paced transactional data into accurate digital records for post-event financial reporting.

Procurement Assistant — Al Fuzail Engineering Services *May 2023 – Dec 2023 | Doha, Qatar*

- Maintained supplier, purchase order, and invoice records — entering and cross-checking data across multiple systems to ensure 100% inventory data accuracy.
- Handled petty cash tracking and expense reconciliation, creating monthly summary reports for finance review using Excel pivot tables and charts.
- Identified and resolved data inconsistencies between procurement and accounting systems, preventing duplicate payments and saving an estimated QAR 8,000+ annually.

Cashier And Reporting — Al Mahroosa Supermarket *Feb 2022 – Feb 2023 | Doha, Qatar*

- Maintained and updated internal product databases, ensuring data consistency and integrity across 500+ SKUs in the inventory management system.
- Generated daily sales and inventory reports using Excel, flagging low-stock items and identifying fast-moving products to support purchasing decisions.

FEATURED PROJECTS

Sahil's AI Data Studio v5.0 — Data Cleaning & Analytics Platform

Independent Project | Python (Pandas, NumPy), JavaScript, Browser-Based | 2026

- Built a browser-based data cleaning, transformation, and analytics application handling CSV, TSV, XLSX, and JSON files up to 1– 2GB using chunked, memory-stable processing.
- Implemented a full data-audit layer: missing-value detection, duplicate identification, and outlier flagging via 3-Sigma and 1.5×IQR methods with automated imputation pipelines.
- Developed automated cleaning workflows — text-to-number conversion, date standardization, trimming, deduplication — with full undo/redo functionality and audit trails.
- Created an analytics panel generating descriptive statistics, distribution histograms, and top/bottom-5 rankings with multiformat export (CSV, XLSX, JSON) and one-click PowerPoint summary generation.
- Leveraged AI prompting (Claude / DeepSeek and KIMI) to accelerate code generation, debug complex transformation logic, and generate executive narrative summaries from statistical outputs.

Sales Report Dashboard — Power BI & Excel Integration

Portfolio Project | Power BI Desktop, DAX, Excel | 2026

- Designed an interactive Power BI dashboard tracking daily sales KPIs, product performance, and customer segmentation for a telecom retail environment.
- Built DAX measures for dynamic revenue calculations, month-over-month growth rates, and target-vs-actual variance analysis.
- Integrated Excel data sources with automated refresh, enabling real-time decision-making for sales leadership.
- Created drill-through reports by product category, sales representative, and time period with automated PDF export for stakeholder distribution.

KEY ACHIEVEMENTS & IMPACT

- Automated Reporting: Reduced manual reporting time by 60% through Python + Excel automation at Ooredoo Qatar.
- Zero-Error Reconciliation: Maintained 100% accuracy in cash reconciliation across multiple high-volume cashier roles.
- Top Sales Performer: Consistently exceeded monthly targets by 15–20%, ranking in the top 10% of the sales team.
- Full-Stack Tool Builder: Independently designed and deployed a production-ready data analytics application from scratch.
